

Code:

```
C SystemCalls.c
C: > Users > rohit > OneDrive > Desktop > OSSP > practical > C SystemCalls.c > ...
1  #include <stdio.h>
2  #include <fcntl.h>
3  #include <unistd.h>
4  #include <stdlib.h>
5
6  int main()
7  {
8      int source_fd, dest_fd;
9      char source[100], destination[100];
10     char buffer[1024];
11     ssize_t bytes_read, bytes_written;
12
13     // Accept source file name
14     printf("Enter source file name: ");
15     scanf("%99s", source);
16
17     // Accept destination file name
18     printf("Enter destination file name: ");
19     scanf("%99s", destination);
20
21     // Open source file for reading
22     source_fd = open(source, O_RDONLY);
23
24     if (source_fd == -1)
25     {
26         perror("Error opening source file");
27         return 1;
28     }
29
30     // Open/Create destination file for writing
31     dest_fd = open(destination, O_WRONLY | O_CREAT | O_TRUNC, 0644);
32
33     if (dest_fd == -1)
34     {
35         perror("Error opening destination file");
36         close(source_fd);
37         return 1;
38     }
39
40     // Read from source and write to destination
41     while ((bytes_read = read(source_fd, buffer, sizeof(buffer))) > 0)
42     {
43         bytes_written = write(dest_fd, buffer, bytes_read);
44     }
```

```

        if (bytes_written == -1)
        {
            perror("Error writing to destination file");
            close(source_fd);
            close(dest_fd);
            return 1;
        }
    }

    if (bytes_read == -1)
    {
        perror("Error reading source file");
    }
    else
    {
        printf("File copied successfully.\n");
    }

    // Close both files
    close(source_fd);
    close(dest_fd);

    return 0;
}

```

Output:

```

Enter source file name: practical1.c
Enter destination file name: practical2.c
File copied successfully.

```
